

NATURAL DISPOSABLES

PRODUCT CATALOGUE

Version 2019/08

NO PLASTIC,
NO PAPER,
NO WORRIES

WORRYFREE DISPOSABLES

Our game changer products are made of natural plant fibers and can replace plastic and paper disposables. The innovative and sustainable material is the most environmentally friendly alternative to conventional materials on the market today.

Our products are made from existing agricultural by-products occurring during seasonal field or greenhouse harvest, such as banana stems, sugarcane leaves and bagasse as well as rice straw. In the spirit of promoting a sustainable economy, BIO-LUTIONS uses only raw materials that are outside of the human food chain and by sourcing currently unused raw materials, we do not require new or adjusted land use. What sets us apart from the paper industry,

is that we do not chemically extract cellulose, a procedure which is expensive and extremely energy intense. Since our patented technology allows us to instead mechanically process the whole natural fibre we also do not need any glue or binding agents, as our fibres are self-binding.

Our products are designed with their purpose in mind: as a single use product they are made in such a way that disposal is easy. BIO-LUTIONS products are biodegradable and can be recycled as paper or burned energy efficient and CO2 neutral.

NO PLASTIC,
NO PAPER
NO WORRIES

TABLEWARE

	made of whole natural fibers
	no cellulose extraction
	biodegradable
	strong
	for food contact*
	suitable for moist and greasy food
	mikrowaveable (5min, 100°C)

* in accordance with BfR XXXVI (Paper and board for food contact) and additional material specific tests

4" BOWL

Ø	height	capacity
10,2 cm	3,3 cm	180 ml

7" PLATE

Ø	height
17,5 cm	1,6 cm

10" PLATE

Ø	height
25 cm	2,8 cm

12" PLATE

Ø	height
28 cm	2,8 cm

12" COMPARTMENT PLATE

Ø	height
28 cm	2,8 cm

PACKAGING

	made of whole natural fibers
	no cellulose extraction
	biodegradable
	strong
	for food contact*
